

Intuit Dome Arena Store Analysis

A defensible view of revenue mix, transaction economics, and demand timing

\$1.156M

NET SALES

31,346

TRANSACTIONS

3

PLAYOFF GAMES

Oluwaseyi Caleb Folorunso

Four facts replace four vague claims

\$1.156M

NET SALES

31,346 transactions from 16,835 purchasing accounts.

62.8%

FOOD & BEVERAGE SHARE

Food & beverage was 1.69× retail—or 69.1% higher.

3 of 3

REVENUE PEAK

The final hour before scheduled tipoff led every game.

0

MATCHING ENTRY IDS

Individual entry-to-purchase conversion is not identifiable.

Descriptive window: Games 3, 4, and 6 of one playoff series

Food & beverage is the scale engine

\$725K
FOOD & BEVERAGE

1.69×
versus retail sales

99.1%
F&B share inside mixed-format stores

Correct framing: 69.1% higher—not 1.7% better.

Mixed stores win volume; retail wins ticket

TRANSACTION VOLUME

AVERAGE TRANSACTION VALUE

OPERATING IMPLICATION

Run distinct tests: throughput at mixed stores; attach at retail.

ATV is calculated after aggregating all line items to one transaction.

Normalize to tipoff: hour -1 is the revenue peak

HOUR -1 SHARE

34.0%

Game 3

35.6%

Game 4

27.6%

Game 6

Peak revenue, not necessarily peak transaction count.

Displayed window contains 98.8% of sales.

Game 6 net sales finished 22.8% below Game 3

DECLINE, GAME 3 → GAME 6

-22.8% net sales

-13.7% transactions

-10.6% average ticket

Cause remains unobserved

323 accounts

Descriptive cohort signal

purchased in all 3 games

1.9% of customers

13.5% of sales

Conversion is not identifiable in this workbook

Quality check	Observed	Treatment
Sales rows mapped to stores	100%	PASS · many-to-one; dollars reconcile
Store-entry mapping	89.7%	REVIEW · 5,088 events lack lookup rows
Duplicate-looking sales lines	94	REVIEW · retained; no immutable line ID
Missing / repeat identified entry events	3,549 / 22,468	REVIEW · rows are events, not attendees
Entry IDs found in customer map	0	BLOCKER · do not calculate conversion

Also blocked: EntryScans IDs have zero overlap with CustomerIDs.

Test, measure, then scale

01

Protect hour -1

Pilot incremental staffing, replenishment, and queue coverage.

MEASURE Revenue/min · wait · abandonment · stockouts

02

Test retail attach

Randomize or phase a merchandise-plus-concessions prompt.

MEASURE Exposure · lift · basket · margin · cannibalization

03

Diagnose the decline

Explain the Game 3-to-Game 6 drop before choosing a remedy.

MEASURE Attendance · open minutes · staffing · inventory · promo

04

Repair measurement

Complete checkpoint mapping and create a governed identity bridge.

MEASURE Match rate · consent · retention · event definition

BOUNDARY

3 games · net sales ≠ profit · no attendance, margin, inventory, queue, staffing, or exposure fields
